needs.

Single button dropdowns

Any single `.btn` can be turned into a dropdown toggle with some markup changes. Here's how you can put them to work with either `<button>` elements:

```
<div class="dropdown">
  <button class="btn btn-secondary dropdown-toggle" type="button" id="dropdownMenuBut
    Dropdown button
  </button>
  <div class="dropdown-menu" aria-labelledby="dropdownMenuButton">
    <a class="dropdown-item" href="#">Action</a>
    <a class="dropdown-item" href="#">Another action</a>
    <a class="dropdown-item" href="#">Something else here</a>
  </div>
</div>
```

Copy

And with `<a>` elements:

Methods

Events

Шаблонизация

```
<div class="dropdown">
```

```
  <button class="btn btn-secondary dropdown-toggle" type="button"  
id="dropdownMenuButton" data-toggle="dropdown" aria-  
haspopup="true" aria-expanded="false">
```

Dropdown button

```
</button>
```

```
<div class="dropdown-menu" aria-labelledby="dropdownMenuButton">
```

```
  <a class="dropdown-item" href="#">Action</a>
```

```
  <a class="dropdown-item" href="#">Another action</a>
```

```
  <a class="dropdown-item" href="#">Something else here</a>
```

```
</div>
```

```
</div>
```
