

Например, кнопка

github.com/OfficeDev/office-ui-fabric-react

```
import { BaseComponent, warn } from '../Utilities';  
import { ButtonType, IButtonProps } from './Button.Props';  
import { DefaultButton } from './DefaultButton/DefaultButton';  
import { CommandButton } from './CommandButton/CommandButton';  
import { CompoundButton } from './CompoundButton/CompoundButton';  
import { IconButton } from './IconButton/IconButton';  
import { PrimaryButton } from './PrimaryButton/PrimaryButton';
```

Например, кнопка

```
public render() {  
  const props = this.props;  
  switch (props.buttonType) {  
    case ButtonType.command:  
      return <CommandButton { ...props } />;  
    case ButtonType.compound:  
      return <CompoundButton { ...props } />;  
    case ButtonType.icon:  
      return <IconButton { ...props } />;  
    case ButtonType.primary:  
      return <PrimaryButton { ...props } />;  
    default:  
      return <DefaultButton { ...props } />;  
  }  
}
```
