

Полная декларативность: реальный пример

```
<div class="dropdown">  
  <button class="btn btn-secondary dropdown-toggle" type="button"  
id="dropdownMenuButton" data-toggle="dropdown" aria-  
haspopup="true" aria-expanded="false">  
  
  </button>  
  <div class="dropdown-menu" aria-labelledby="dropdownMenuButton">  
  
    <a class="dropdown-item" href=""  
      ">  
                                </a>  
  
  </div>  
</div>
```

Полная декларативность: реальный пример

```
block('dropdown')(
  content()(node => [
    {
      block: 'btn',
      mods: { secondary: true },
      mix: 'dropdown-toggle',
      attrs: {
        type: 'button',
        id: 'dropdownMenuButton',
        'data-toggle': 'dropdown',
        'aria-haspopup': true,
        'aria-expanded': false
      }
    },
    {
      elem: 'menu',
      attrs: { 'aria-labelledby': 'dropdownMenuButton' },
      content: applyNext().map(item => ({
        elem: 'item',
        url: item.url,
        content: item.text
      })))
  ]),
  elem('item').replace()(node => ({
    block: 'link',
    mix: node.ctx,
    url: node.ctx.url,
    content: node.ctx.content
  })))
)
```
